# INTRODUCTION

---

Many individuals, businesses, and municipalities are interested in local and rural economic development projects. Planning and developing a project often requires information on the community in which it will be located and the economic conditions of that community, and the surrounding area. The *Southwestern Montana Resource Assessment and Profile* was written to provide planners, community organizers, grant writers, government officials, other interested professionals, and citizens with an overview of the communities in a seven-county area in southwestern Montana. Those counties include: Beaverhead, Deer Lodge, Granite, Jefferson, Madison, Powell, and Silver Bow.

The *Southwestern Montana Resource Assessment and Profile* is divided into 6 sections. Section 1, "Southwestern Montana—An Overview," describes the area and includes information on characteristics of the population, the labor force, transportation linkages, business activities, financial resources, and potential business and industrial sites. Section 2, "Southwestern Montana and Its Economy," details information on economic activities as well as economic conditions in the counties and throughout Montana. Section 3, "Community Facilities and Services," presents information on housing facilities, educational institutions, cultural and recreational facilities, medical facilities and services, social services, water supply, waste management, wastewater treatment, fire protection, and utility services. Section 4, "Transfer Payments," lists transfer payments to counties. Section 5, "Recreation and Tourist Activities and Attractions," lists published directories of area activities as well as area attractions. Section 6, "Development Organizations," lists agencies and organizations which are organizing on the local level, working for rural development, or working with local grassroots or government sponsored agencies or organizations. A bibliography cites the information resources used in preparing this report. A topical index is provided to assist the user in locating specific information.

Every effort has been made to present accurate, comprehensive information in this report. Every project is unique and it is recommended that this report be used as a starting place to learning about and understanding communities in the Headwaters RC&D area. It is not a substitute for working closely with Local Development Corporations, Chambers of Commerce, local government officials, and citizens in each community.

---

## **SECTION ONE**

---

### **SOUTHWESTERN MONTANA – AN OVERVIEW**

## GENERAL DESCRIPTION OF AREA

The Headwaters Resource Conservation and Development (RC&D) Area, Inc. serves a seven county area in southwestern Montana including Beaverhead, Deer Lodge, Granite, Jefferson, Madison, Powell, and Silver Bow counties. See Figure 2 for the RC&D location map and Figure 1 for the RC&D organizational chart.

The incorporated cities and towns within the seven county area are: 1) Beaverhead County: Lima, Dillon; 2) Deer Lodge County: Anaconda; 3) Granite County: Philipsburg, Drummond; 4) Jefferson County: Boulder and Whitehall; 5) Madison County: Ennis, Sheridan, Twin Bridges, and Virginia City; 6) Powell County: Deer Lodge; and 7) Silver Bow County: Butte and Walkerville. Major communities within a 300 mile radius include: 1) Montana: Bozeman, Billings, Great Falls, Helena, Missoula, Livingston, Gardiner, Cooke City, West Yellowstone, Kallispell, Browning, Shelby, Havre, Lewistown, Anaconda, Deer Lodge; 2) Idaho: Coeur D'Alene, Moscow, Idaho Falls; 3) Oregon: Baker and 4) Washington: Spokane, Walla Walla.

The headwaters of two major drainage systems in the United States originate in the project area. According to the world almanac, waters from the drainage system in Beaverhead County have the distinction of traveling the greatest distance (3,710 miles) of all rivers in the United States before entering the Gulf of Mexico via the Mississippi River. The headwaters of the Missouri River, which flow into the Mississippi, drain 70 percent of the project area.

The Headwaters RC&D Project Area is bounded on the west and the south by the Continental Divide. Topographic features of the project area are of extremes, ranging from nearly level valleys to rugged majestic mountains with peaks reaching above 11,000 feet. The lowest elevation (3,590 feet above sea level) is located on Rock Creek in Granite County and the highest peak is Hilgard Peak (11,316 feet above sea level) in Madison County. The area is characterized by several broad valleys with elevations above 5,000 feet. The area varies from mountainous areas forested with lodgepole pine and Douglas fir trees to farms and ranches with some irrigated croplands.

## TRANSPORTATION LINKAGES

---

### AIR TRANSPORTATION

Delta Airlines, Skywest Airlines, and Northwest AirlinK serve the Bert Mooney Airport in Butte. A map showing air distances between Butte and other major cities in the United States and Canada is included as Figure 3.

#### AIRPORT FACILITIES

---

COUNTY:	Beaverhead
---------	------------

---

AIRPORT:	Dell Flight Strip
LIGHTED:	Yes
NAV. AIDS:	None
REPAIRS:	None
RUNWAY:	5000' X 150' Paved
SERVICES:	Meals, 2 mi.
COMMENTS:	Phone in Dell. 1000' gravel overrun each end of runway-usable. Rwy pavement in poor condition.

AIRPORT:	Dillon Airport
LIGHTED:	Yes
NAV. AIDS:	Yes
REPAIRS:	None
RUNWAY:	4000' X 75' Asphalt, 3500' X 95' Turf, 2535' X 100' Turf
SERVICES:	Taxi; Meals & lodging, 5 mi.
COMMENTS:	Rwys 3/21 and 7/25 rough. Major runway repairs during 1988 construction season

AIRPORT:	Wisdom Airport
LIGHTED:	No
NAV. AIDS:	None
REPAIRS:	None
RUNWAY:	3500' X 75' Turf
SERVICES:	Meals & lodging, 2 mi.
COMMENTS:	Phone on field. Field may be rough. No snow removal. Closed with first heavy snow.

---

COUNTY:	Deer Lodge
---------	------------

---

AIRPORT:	Anaconda Airport
LIGHTED:	Yes
NAV. AIDS:	None
REPAIRS:	Major
RUNWAY:	4500' X 60' Asphalt; 3600' X 60' Gravel
SERVICES:	Meals & lodging, 3 mi.
COMMENTS:	Phone on field, Rwy 16/34 not maintained in winter

**COUNTY:** Granite

AIRPORT: Drummond Airport

LIGHTED: Yes

NAV. AIDS: Yes

REPAIRS: None

RUNWAY: 2400' X 125' Turf

SERVICES: Meals & lodging, 6 mi.

COMMENTS: None

AIRPORT: Riddick Field (Philipsburg)

LIGHTED: Yes

NAV. AIDS: None

REPAIRS: None

RUNWAY: 3600' x 60' Asphalt

SERVICES: Meals & lodging, 1.5 mi.

COMMENTS: None

**COUNTY:** Jefferson

AIRPORT: Boulder Airport

LIGHTED: No

NAV. AIDS: None

REPAIRS: None

RUNWAY: 3650' X 75'

SERVICES: Meals & lodging, 3 mi.

COMMENTS: Rwy 11/29 may be rough. Steep uphill grad. SE to NW

**COUNTY:** Madison

AIRPORT: Blg Sky Airport (Ennis)

LIGHTED: Yes

NAV. AIDS: None

REPAIRS: Major

RUNWAY: 5280' X 125' Turf

SERVICES: Courtesy car; Meals & lodging, 6 mi.

COMMENTS: Phone on field. Soft when wet. Subject to crosswinds and turbulence.

AIRPORT: Sportsmans Field (Ennis)

LIGHTED: No

NAV. AIDS: None

REPAIRS: None

RUNWAY: 3667' X 75'

SERVICES: Meals & lodging on field

COMMENTS: Private field. Tie-down fee charged to non-lodge guests.

AIRPORT: Twin Bridges Airport

LIGHTED: No

NAV. AIDS: None

REPAIRS: None

RUNWAY: 3380' X 110' Turf; 3420' X 95' Turf

SERVICES: Meals & lodging, 2 mi.

COMMENTS: Phone on field. Pilot registration desk.

**COUNTY:** Powell

AIRPORT: Deer Lodge City/County Airport

LIGHTED: Yes

NAV. AIDS: Yes

REPAIRS:	None
RUNWAY:	4400' X 75' Asphalt
SERVICES:	Meals & lodging, 2 mi.
COMMENTS:	None

COUNTY: **Silver Bow**

AIRPORT:	Bert Mooney Airport
LIGHTED:	Yes
NAV. AIDS:	Yes
REPAIRS:	Major
RUNWAYS:	9000' X 150'; 5100' X 75'
SERVICES:	Taxi, limo, courtesy car; Meals on field; lodging 1 block
COMMENTS:	None

## HIGHWAYS

The Headwaters RC&D area has approximately 321 miles of interstate highways, 521 miles of primary highways, and 341 miles of secondary roads. More detailed information on roads and streets by system and by county is available in the *Federal Aid Road Log*, published annually by the Montana Department of Highways and the U.S. Department of Transportation. Butte is the intersection point for Interstates 15 and 90, which provide both north/south and east/west highway service. I-90 and I-94 run east to Bismarck, Minneapolis and Chicago and west to Spokane, Portland, and Seattle. I-15 runs north to Canada and south to Salt Lake City, Boise, and Los Angeles. Interstate highway distances to major cities from Butte are shown in Figure 4.

Locally, Butte is linked to Deer Lodge through I-90 and to Dillon, Lima, and Boulder through I-15. State Highway 1 connects Anaconda and Philipsburg to I-90. State Highways 41, 55, and 287 link Whitehall, Ennis, Virginia City, Twin Bridges and Sheridan.

Intermountain Bus Lines, which has its headquarters in Anaconda, provides intercity bus service to: 1) Beaverhead County serving Dillon and other communities along the Interstate Highway 15 corridor; 2) Anaconda and the northern part of Deer Lodge County; 3) Granite County; 4) Powell County; and 5) Silver Bow County. In addition, Greyhound provides services in Silver Bow County and Rimrock Stages in Powell County.

## RAILWAYS

Rail service in southwestern Montana is provided by Class I Railroads-Burlington Northern, Montana Rail Link, Inc., and Union Pacific. Burlington Northern operates from Whitehall to Butte. Union Pacific operates a line from the south into Butte. Additional service to the area is provided by Class III railroads-Montana Western Railway and Rarus Railway. Montana Western Railway operates the 52 mile Butte to Garrison line and serves as a bridge carrier between the Union Pacific at Silver Bow and Montana Rail Link at Garrison. Rarus Railway, previously the Butte, Anaconda & Pacific Railway, operates a short line from the Anaconda area connecting to Burlington Northern and Montana Western Railway lines as well as interchanges for both Anaconda and Butte Industrial Parks.

Butte is served by both Burlington Northern and Union Pacific Railroads. Burlington Northern provides connecting service from Whitehall to Butte. Montana Rail Link operates most of the southern mainline, formerly owned by Burlington Northern, and serves: 1) Granite County-Drummond; 2) Jefferson County-Montana City; and 3) Madison County-Harrison, Sheridan, and Twin Bridges.

Rail distances to major cities from Butte are shown in Figure 5.

## U.S. SMALL BUSINESS ADMINISTRATION

The U.S. Small Business Administration (SBA) is a small, independent Federal agency created to counsel and champion small businesses in the United States. SBA provides prospective, new, and established persons in the small business community with financial assistance, management counseling, and training.

By law, an applicant must first seek financing from a bank or other lending institution before using SBA loan assistance. SBA offers two basic types of business loans-guaranty loans and SBA direct loans. Guaranty loans are made by private lenders, usually banks and guaranteed up to 90 percent by SBA. Most SBA loans are made under the guaranty program. The maximum guaranty percentage of loans exceeding \$155,000 is 85 percent. SBA can guarantee up to \$500,000 of a private sector loan.

There are three principal parties to an SBA guaranty loan: SBA, the small business applicant, and the private lender. The lender plays the central role in the loan delivery system. The small business submits the loan application to the lender, who makes the initial review, and, if approved for submission to SBA, forwards the application and analysis to the local SBA office. If approved by SBA, the lender closes the loan and disburses the funds.

SBA direct loans have an administrative maximum of \$150,000 and are available only to applicants unable to secure an SBA guaranteed loan. Before applying for an SBA direct loan, an applicant must first seek financing from his/her bank of account.

Table 19 lists totals of approved SBA business loans by county for fiscal year 1986, fiscal year 1987, and the first six months in fiscal year 1988.

# POTENTIAL BUSINESS AND INDUSTRIAL SITES

COUNTY	TOWN	SITE INFORMATION
Beaverhead	Dillon	<p><u>Owner:</u> Beaverhead County, P.O. Box 1381, Dillon, MT 59725</p> <p><u>Site(s):</u> 1) 17 acre site next to golf course, 2) 8 acre site at county airport 4 miles outside of Dillon.</p>
Deer Lodge	Anaconda	<p><u>Owner:</u> Anaconda Local Development Corporation, P.O. Box 842, Anaconda, MT 59711</p> <p><u>Site(s):</u> 1) Heavy Industrial Park-a dozen buildings which could be occupied as a group or separately. In addition, the site is served by a paved road and a rail spur and is fully developed. 2) Anaconda Light Industrial Park is a 37 acre fully developed site.</p> <p><u>Owner:</u> Anaconda Local Development Corporation, P.O. Box 842, Anaconda, MT 59711</p> <p><u>Site(s):</u> A 40,000 square foot masonry and steel-reinforced building located at Oak and 7th Streets.</p>
Granite		<p><u>Owner:</u> Louisiana-Pacific Corp., Deer Lodge, MT 59722</p> <p><u>Site:</u> Approximately 80 acres 1/4 mile west of Philipsburg, MT; 6 inch water main with fire hydrants; 440-3 phase electric; gravel and rock surface.</p>
Jefferson	None	
Madison	None	
Powell	Deer Lodge	<p><u>Owner:</u> Gloria Buck (For Information contact Powell County Progress, P.O. Box 776, Deer Lodge, MT 59722)</p> <p><u>Site:</u> This 12.16 acre site is located west of and adjacent to the city of Deer Lodge on West Milwaukee Avenue.</p> <p><u>Owner:</u> The Stelling Corporation and John and Kathryn Stelling (For information contact Powell County Progress, P.O. Box 776, Deer Lodge, MT 59722)</p> <p><u>Site:</u> This 8.7 acre site is all of Block 1 and lots 2-3 of Block 3 of the Warren Acres Subdivision on North Main adjacent to the northern boundary of the city of Deer Lodge.</p> <p><u>Owner:</u> Varies (For information contact Powell County Progress, P.O. Box 776, Deer Lodge, MT 59722)</p> <p><u>Site:</u> Seven buildings varying in square footage from 5000 square feet to 29,090 square feet are available for potential industrial use</p>
Silver Bow	Butte	<p><u>Owner:</u> Butte Local Development Corporation, P.O. Box 507, Butte, MT 59703</p> <p><u>Site:</u> Butte Industrial Park, 100 acres, fully developed</p>

Owner: Butte Local Development Corporation, P.O. Box 507, Butte, MT 59703  
Site: Silver Bow Industrial Park; The Butte LDC has options for potential business development on an undeveloped 300 acre site at Rocker.

Owner: Bagdad Temple, 314 West Park, Butte, MT 59701  
Site: Former Shrlne Race Track, Area; 29.3 acres, west half section 25 east half of section 26, township 3 north, Range 8 West, Parcel #42300

Owner: Joe Schumacher, c/o New York Life Insurance, Miners Bank Building, Butte, MT 59701  
Site: Parrott Flats-3.7 acres divided into 54 30' x 100' lots

Owner: USA Investments, 1005 Durston Road, Bozeman, MT 59715  
Site: The old Anaconda shop area located north of Granite Street and east of Arizona Street and west of the Berkeley Pit

Owner: Port of Montana, P.O. Box 3641, Butte, MT 59702  
Site: Old Safeway Warehouse-Montana Agri-Foods industrial Complex FDA approved for food storage. The concrete floor can support 300 pounds per square foot. The building has 165,000 sq. ft. of cold storage, located with 15 acres of hard-surfaced open storage on a total 22-acre site. Loading access is provided by 18 truck docks, 12 double truck doors, and 9 railroad docks. Office space, a one megawatt power supply and truck repair shops are also part of the building.

## RECREATION AND TOURIST ACTIVITIES

While recreation and tourist activities offer a significant contribution to the southwestern Montana economy, that contribution is often difficult to quantify. In addition to motels, resorts, museums, visitor attractions, ski areas, fishing guides, and outfitters which directly serve the tourist industry, many other types of businesses may be impacted by visitors. Those businesses include service stations, laundromats, restaurants, grocery stores, movie theaters, and many others.

The Montana Department of Labor and Industry (DOLI), Research and Analysis Bureau in Helena maintains statistical information on annual employment and wages by county and by industry. But neither tourism nor recreation are considered as separate industries. General merchandise, service stations, food stores, and eating and drinking establishments are entered under the category, Retail Trade. Hotels and lodging, auto-repair services, motion pictures, amusements and recreational services, and museums and zoos are under the category, Services. Air transportation and local-urban transportation are listed under Transportation, Communication, and Public Utilities. The general building industry, which may show economic increases if new hotels and recreational facilities are built, is listed under the category, construction. Because visitors may impact many different types of businesses, it is difficult to get an accurate picture of the impact to an area from DOLI statistics.

The following earlier studies discuss the travel industry and tourism marketing research: 1) Dailey, Richard. *The Montana Travel Industry*, 1983. Helena, MT, Montana Promotion Division, 1984; and 2) Brock, James L. et al. *Montana Tourism Marketing Research Project*, Helena, MT, Montana Promotion Division, 1984.

Many state and federal agencies and private organizations have recognized the need for more accurate economic information on how much money is generated by tourist and recreational activities and where those dollars are spent. State studies, surveys, and use and activity reports currently being compiled should, in the future, provide valuable insights into those activities in Montana and how they relate to the state's overall economic picture.

The Montana Department of Fish, Wildlife and Parks (DFWP), the U.S. Forest Service, and the U.S. Bureau of Land Management all maintain information on visitors who use public lands. The Montana Promotion Division is also an information source for statistics related to the tourist industry.

The DFWP maintains detailed information on fishing and has statistics available by county and by stream name or river section, with information on number of trips and catch rate for resident and nonresident fishermen. Detailed hunting pressure information is maintained by hunting district. The recently released DFWP study, *On Common Ground: The Economic Value of Hunting and Fishing in Montana*, was done to estimate the net economic value of stream and lake anglers, and deer, elk and antelope hunters in Montana.

The Montana Promotion Division is maintaining current information on the accommodations tax revenue by county. (See Table 23, page 53) The Montana Promotion Division also conducted a study of the Montana ski industry for 1987/88 which lists total skier days & revenues, and skier day information which compares day to overnight skiers and Montanans to out-of-staters. Although none of the southwestern Montana ski areas (Discovery Basin, Wraith Hill, Beef Trail, and Maverick Mountain) participated in the study, the study does present an overview on how increased revenues generated by the ski industry impact surrounding communities.

In 1986, Shannon Taylor and Michael D. Reilly of the Faculty of Business at Montana State University, coauthored the study, *Economic Impact of the Outfitting Industry on the State of Montana*. The study estimates expenditures for guided and non-guided hunters and fishermen with total dollar amounts for the economic impact of Montana's outfitting industry in 1985. The study, commissioned by the Montana Outfitters and Guides was done to get a better picture of how the economic impact was distributed across various sectors of the economy besides the outfitting industry. In addition to outfitters and guides expenses, average expenses are estimated for air tickets, car and gas, motels, restaurant food, gifts, tips, alcoholic beverages, licenses, and other areas. Additional information is included on how much money the outfitters, themselves, spend in Montana.

The Statistical Center of Montana State University prepared a survey of the economic impact of non-resident anglers in Montana for the 1982 season. The survey, coordinated by the Madison-Gallatin Chapter of Trout Unlimited, was a mail survey conducted in January of 1983 detailing information on people who fish in Montana, where they fish, and the amount of money spent per trip.

Stephen McCool, Director of the Institute for Tourism and Recreation Research, at the School of Forestry at the University of Montana is currently directing a survey of non-Montana residents who are traveling in state both by car and by air. Results of the study will be available in 1989. Mr. McCool and Jeffrey Frost were authors of a 1986 study of Montanans and their participation in recreation activities. The study, *The Montana Outdoor Recreation Needs Survey*, which is summarized in the Autumn 1987 issue of *Montana Business Quarterly*, generally concludes that there will be little expansion of the outdoor recreation market for Montanans during the next decade.

While most studies cover the entire state, several studies have been done which deal with the economics of the tourist industry and/or recreation activities locally: 1) Greater Butte Tourism Task Force. *Greater Butte Tourism/Development Project*, Butte, MT, Butte-Silver Bow Chamber of Commerce, 1984; 2) Hughes, Edward. *Economic Analysis of the Impact of the High Altitude Speed Skating Center on Silver Bow County and the State of Montana*; and 3) Poizin, Paul E. *An Economic Analysis of Travel and Tourism in the Butte-Anaconda Area*, Missoula, MT, Bureau of Business and Economic Research, 1985.

---

# ECONOMIC CONDITIONS

---

## INTRODUCTION

The current economic conditions of the Headwaters RC&D area depend on the interaction of primary industries with a number of other factors such as transportation, energy, and available labor force. This section reviews the economic conditions of four industries-agriculture, mining, timber, and tourism-and discusses past history, current conditions, and the outlook for the future of each industry. This section also presents an overview of economic conditions related to transportation, energy, and labor force, and how conditions in each of those areas relate to the above mentioned four industries. Another area of consideration is the role of local groups and government in encouraging local business development.

The economic base in Montana has decreased. The U.S. Bureau of Economic Analysis, 1986, reports the following losses during the 1979-1985 time period in Montana: 1) wood and paper-\$68 million; 2) agriculture-\$72 million; 3) military-\$7 million; 4) Federal civilian-\$17 million; 5) railroads-\$79 million; 6) other manufacturing-\$67 million; and 7) mining-\$40 million.

The economic base in Montana is still heavily dependent on the resource industries. Some of the current economic conditions are associated with economic cycles which have historically affected mineral, timber, and agricultural demands. During the last decade national and international factors have also influenced the demand for metal, lumber, and agricultural products. Industries must rely on new technology, further mechanization, and increased productivity to stay competitive. This can be observed especially in the Montana timber industry.

There is an economic dependence upon government in the Headwaters RC&D area. (See Economic Activities, Tables 21 to 22) The total taxable wages for government in the seven counties range from 30% in Silver Bow County to 61% in Powell County. The counties also show an increasing reliance on transfer payments on a per capita basis over the 1980-1985 data period. (See Transfer Payments, Table 31, page 117) For example, Deer Lodge County had transfer payments, per capita, of \$1.59 in 1980 which had increased to \$3.03 by 1985, an increase of 1.9 times or 190%. Silver Bow County increased from \$1.37 to \$2.95, an increase of 2.15 times or 215%. All seven counties show approximate increases ranging from 1.4 times or 140% up to 2.15 times or 215%.

Economic conditions in agriculture, mining, timber, and tourism are all affected by local, statewide, regional, national, and international events and economic conditions. The final section, Economic Conditions in Montana, discusses the overall economic picture for Montana and an overview of regional economics.

## AGRICULTURE

Agriculture is an important industry in the Headwaters RC&D area. Maxine Johnson of the Montana Bureau of Business and Economic Research discusses the agriculture industry in the Spring 1988 issue of *Montana Business Quarterly*, in "Montana and the National and World Economies: The Outlook for 1988 and Beyond." In part, she discusses farm labor income and the outlook for the state's two major agricultural products, wheat and cattle.

The Bureau of Business and Economic Research notes a sharp drop in farm labor income after 1981, a sharp rise as a result of the new farm program and improved cattle prices in 1986, and figures that stayed approximately the same in 1987. Projections for 1988 to 1990 also indicate that farm labor income will stay at approximately the same level.

Ms. Johnson notes that the problem with wheat exports nationwide is that the United States grows more wheat than it can sell. While the United States is still a major supplier, the U.S. share in the world export market continues to decline. Since 1985, cuts in acreage nationwide under the new farm programs have reduced production and the falling dollar has helped exports. But we still have too much wheat and the long term

problems remain, including the question of how much longer U.S. taxpayers will be willing to foot the bill for these very expensive farm programs. No matter what the agricultural industry does in Montana, the U.S. Congress is going to determine the future of many Montana grain growers.

Additionally, Ms. Johnson discusses the cattle industry and notes that Montana and U.S. cattle producers primarily serve the domestic market, where they have been confronted with changes in eating habits and increased competition from poultry and fish. The typical American in 1976 (the peak year) ate about ninety-eight pounds of beef but by 1979, that figure had fallen to eighty pounds. It now seems to be inching up, and the beef industry continues efforts to regain its markets by providing leaner meat and marketing it more aggressively.

There are some positive aspects in the agriculture sector for the near future. Profits have been better than expected, even though moderate. Farmland is worth more as land values rise. According to the Federal Reserve Bank in Minneapolis (March 1988) farmers continued to repay their debts at an above average pace. Now that farmers seem more confident with their debt levels and more confident about the farm economy's future, they are spending more, mainly on farm machinery and equipment than one year ago.

In spite of these positive aspects, Ms. Maxine Johnson of the Bureau of Business and Economic Research notes that even though farm income has come back from its very depressed levels of a few years ago, Montana farmers and ranchers continue to face the uncertainties of changing government programs and consumer demand. Some bankers and farmers are worried that insufficient moisture might lower crop yields this during the summer of 1988. Drought conditions are currently pushing agricultural prices higher.

On May 22, 1988, the *Great Falls Tribune*, reprinted an executive summary of a report from the Citizens Network for Foreign Affairs in Washington D.C. which discussed new markets created for American farmers by third world development. In part, the report states:

"The economic well-being of the developing world is increasingly important to the prosperity of U.S. agriculture. Third World development represents potential new markets for U.S. agricultural products and more jobs for Americans. Favorable agricultural policies directed toward the developing world are in our own best interest. Agricultural development creates buying power which makes possible economic growth. With large unmet needs and continuing high rates of population growth, developing countries will be the largest potential growth market for U.S. agricultural exports."

## MINING

As a part of their series, "Mineral Industry Surveys," the U.S. Department of the Interior, Bureau of Mines, publishes an annual survey, "The Nonfuel Mineral Industry of Montana in 1987." It is prepared by the Spokane Regional Office of State Activities in Cooperation with the Montana Bureau of Mines and Geology. The following is the annual preliminary report released January 11, 1988 for the year 1987:

"The estimated value of nonfuel mineral production in Montana for 1987 was \$328 million, an increase of about 38% from that of 1986, according to the Bureau of Mines, U.S. Dept. of Interior. Resumed production of the copper-molybdenum at Butte, increased gold and silver production, and initial platinum-palladium production were largely responsible for the gain. Metallic minerals accounted for nearly 76% of the State's nonfuel mineral production value. Montana ranked 25th nationally in mineral production.

"Montana Resources Inc. completed its first year of full-scale copper molybdenum mining at Butte. Montana Mining Properties purchased the Butte Hill underground mines and began to reopen 'silver belt' properties. ASARCO Inc. continued silver and copper production from the Troy Mine near Libby, and applied for State permits to develop the Rock Creek stratabound silver-copper deposit. Placer Dome U.S. Inc. continued to produce gold at the Golden Sunlight Mine near Whitehall. Pegasus Gold Inc. began production in March at the Montana Tunnels precious-base metals mine and operated the Zortman-Landusky gold mines in the Little Rockies. Stillwater Mining Co. started platinum-palladium production in March at the 500-ton-per-day Stillwater Complex mine near Nye. Silver production resumed in May at Inspiration Mining Inc.'s Black Pine Mine near Philipsburg. Chelsea Resources Ltd. began operations at the Spotted Horse gold mine near Lewistown. Columbia Falls Aluminum Co. operated its aluminum smelter at capacity on tolling contracts with foreign companies. Gulf

Titanium Ltd. continued developing the Cruse-Belmont gold mine near Marysville, and the Jardine Joint Venture awaited a corporate decision to start operations at a gold property near Gardiner.

"Exploration activity in 1987 included: Homestake Mining Co. and Gold Fields Mining Corp. drilled precious metal deposits in the Elkhorn District, Jefferson County, and several companies explored in the Argenta District, Beaverhead County. Western Energy Co. drilled at the Chartam property near Winston and explored the McDonald Meadows, Seven-Up Pete, and Keep Cool properties in Lewis and Clark County. Utah International Inc. continued exploration for massive sulfide deposits in the White Sulphur Springs area, and Santa Fe Pacific Co. drilled for gold and other metals in the Sweetgrass Hills near Chester. Sunshine Mining Co. explored the Big Blackfoot gold property near Lincoln.

"USG Corp. permanently closed the Shoemaker underground gypsum mine and Heath wallboard plant. In May, Cominco American Inc. reopened the Warm Springs Creek underground phosphate mine. Cyprus Industrial Minerals Co., Montana Talc Co., Pfizer Inc., and Willow Creek Talc Co. mined talc in Madison County. W.R. Grace & Co. mined vermiculite at Rainy Creek near Libby."

The many local activities of organizations and businesses in the mining industry indicate a favorable outlook locally for the mining industry. In the spring of 1988, Robertson Research Group, the world's largest natural resource consulting firm, opened an office in Butte. Butte is the location for the Montana College of Mineral Science and Technology, a well-known mining engineering school. The Mining Development Committee, which is active in promoting mining, is also located in Butte. In May 1988, the Butte Mineral Processing Task Force made an initial proposal to Chevron on locating a platinum group metals smelter and refinery in Butte. Montana Resources, Inc. continues to mine copper and molybdenum in Butte.

Also in May 1988 in Butte, New Butte Mining Inc. announced that the shareholders of the parent company, Butte Mining Plc of London, approved the acquisition of North Butte Investments Ltd., the owners of the Margaret Ann property which is located adjacent to existing company properties in the Butte area. The Margaret Ann property contains gold, silver, zinc, and lead ore reserves that will be accessible from existing mine workings currently being reopened. Progress in rehabilitation of the Lexington tunnel in the underground workings of the Rainbow Block has reached the point where access has been gained to underground sulfide reserves with limited production to commence in 1988. Initially, the ore will be processed at a custom mill in Phillipsburg.

Other mines in the region include Montana Tunnels and Sunlight Mine, gold mines in Jefferson County, and Cyprus Mines and Montana Talc in Madison County. The Montana Department of State Lands is preparing preliminary environmental reviews on two proposed gold mines in southwest Montana. One is the Cable Mountain placer mining project about 15 miles west of Anaconda. The other is Montana Mining and Timber Co.'s proposed placer mine on Gold Creek about 11 miles southwest of Garrison. The Gold Creek Mine would be located in the same area where gold was first discovered in Montana in 1852.

In addition, Gold Fields Mining Corp. proposes an exploration drilling program for the Elkhorn Project east of Boulder in Jefferson County on U.S. Forest Service land. The proposal, presented to the U.S. Forest Service, calls for drilling up to 125 sites and constructing roads on 350 acres of public land near Elkhorn during the summer of 1988. The company, which has been exploring patented private claims in the area for about four years, is searching for gold and silver.

During 1987, the well-publicized increase in metal mining activity showed the largest increase in jobs in Montana. Jobs in oil and gas increased modestly, while the coal and nonfuel, nonmetal segments of the industry suffered losses.

Ms. Maxine Johnson of the Bureau of Business and Economic Research discusses mining as a goods-producing industry in the Spring 1988 issue of *Montana Business Quarterly*. She indicates that mining is another goods-producing industry affected by global events. She continues to describe the industry:

"Thanks to the oil boom, Montanans earned more income in mining in 1981 than in any other year. After that, it was all down hill until 1987, when labor income increased by about 9%, thanks to increases in metal mining... We expect further modest increases in total labor income from mining through 1990...

"Like its counterparts in the United States, metal mining in Montana has declined in the face of foreign competition and the recent recession. Prices fell after 1980. So did the U.S. share of world cop-

per and silver production. Our share of gold production, on the other hand, has increased. Recently, higher prices for all three metals have encouraged producers. The Butte mines are profitable, a new gold mine is in operation near Helena, and there are proposals for several more new gold or silver mines. Although we begin from a greatly reduced base, metal mining may be Montana's growth industry over the next few years...

"Nonmetallic mining in Montana grew significantly after the last recession, from 1982 to 1985. It has since leveled off, and little change is expected over the next three years. It is an industry where more growth could eventually occur.

"Montana is a major U.S. supplier of bentonite, talc, and vermiculite."

Current Montana Power Company forecasts also show mining as a good growth sector through 2010. Mineral and precious metal prices are up in this last year and future predictions in the industry are favorable.

## TIMBER

The timber industry makes a significant contribution to total income in the region. The wood and paper products industry historically has played a major role in determining the direction of the economy in the entire Pacific Northwest, in Montana, and likewise in the southwestern Montana region.

Difficult times for the industry in the early 1980s influenced economic conditions throughout the southwestern Montana area. Declines in the wood and paper products employment and labor income have, in general, affected the area's economy.

The article, "Changes in Production Efficiency in Montana's Forest Products Industry," 1976-1986 written by Charles E. Keegan III, K. Jefferson Martin, and Donald G. Stevenson and published in the *Montana Business Quarterly*, winter 1987, discusses the forest products industry in Montana. The report indicates that the late 1970s saw exceptionally good markets, with high consumption and prices for virtually every wood and paper product produced by Montana mills. Those good markets disappeared in the end of 1979 and the 1980s began with a three-year recession in the forest products industry. The report continues:

"An industry-wide trend toward mechanization coincided with the difficult operating conditions, which accelerated mechanization. The industry also shifted toward the production of less labor intensive products, such as studs. The result was the loss of 2,000-2,500 forest products industry jobs in Montana between 1979 and 1985. This loss caused some industry observers to predict that the industry would never regain its prerecession strength. The industry's performance in 1986 dispelled at least some of these predictions. Montana's forest products industry enjoyed record or near-record production and sales in 1986.

"The Bureau of Business and Economic Research collects current information on the operations of the forest products firms in Montana. Cosponsored by the Montana Wood Products Association, the Bureau's Montana Forest Industries Information System showed that production and sales levels during 1986 were among the highest in the industry's history. Data included all major products, from lumber and plywood to pulp and paper, particleboard, and fiberboard.

"The estimated 1,563 million board feet of lumber produced in 1986 was the highest statewide output on record, exceeding the 1,499 million board feet produced in 1968. The plywood industry produced 671 million square feet in 1986, only 16 million square feet below the record high in 1977.

"Near-record sales accompanied record production. Even after adjusting for inflation, total sales value of \$820 million in 1986 almost equalled the peak industry levels in the late 1970s.

"Several factors contributed to the improved conditions in 1986. The general demand for building products remained strong as mortgage rates reached the lowest levels in years. In fact, 1986 marked another year of record lumber consumption in the United States. Other events, in addition to high consumption, led to higher prices. These included strikes at Canadian and northwestern U.S. sawmills, the

lower value of the U.S. dollar, and tariffs and taxes placed on Canadian lumber entering the United States.

"While improved prices encouraged higher production in 1986, the industry's increased ability to produce at a lower cost was a major reason why lumber and plywood sectors achieved such high production rates...

"Record production levels, coupled with relatively low real product prices, convincingly show that the Montana forest products industry has changed significantly due to increased production efficiency....

"Manufacturing costs have declined significantly, and productivity of Montana lumber and plywood plants is up mainly due to increased output per production worker. Further, most of these gains in productivity are permanent adjustments made by producers in poor market periods. These short-term adjustments might include, for example, deferring maintenance of capital equipment which could temporarily boost output per worker.

"Given a fixed industry structure, output per worker generally increases as market conditions deteriorate and production declines. The least productive workers and mills decrease or stop production first. Undoubtedly, this occurred in the sawmill sector as the industry entered the recession in 1980.

"However, output per worker continued to rise as the industry recovered from the trough of the recession in 1982, and the output of lumber and plywood per production worker increased even during the greatly improved market conditions in 1986 and for the first half of 1987. Major producers in Montana attribute the advances primarily to installing new or updating old equipment or, in some cases, replacing older mills.

"The difficult markets of the early 1980s certainly stimulated some mill operators to do more with what they had, but investment in new, labor-reducing equipment caused most of the increases in output per worker...

"Several factors indicate that log-delivered costs have declined. For example, the average high bid price for national forest timber in western Montana and northern Idaho in 1980 expressed in constant 1986 dollars was \$115 per thousand board feet versus \$51 in 1986, a 56% bid decline. However, the average bid price in national forests in Montana east of the Continental Divide in constant 1986 dollars essentially did not change between 1980 and 1986.

"Mechanized harvesting has increased dramatically in Montana during the 1980s. Joseph Gorsh of the U.S. Forest Service, Region I estimates that a greater proportion of timber is harvested in Montana using mechanized systems than in any other western state. The efficient use of mechanized harvesting systems results in substantially reduced harvest costs.

"So, while we cannot make precise estimates of the profitability of Montana's sawmills and plywood plants since the 1970s, we can say that 1) profits were almost certainly higher in the late 1970s, given the large real declines in product prices which have taken place; but 2) the industry today is much better able than before to operate profitably at a given price level.

"Montana wood products producers have faced much lower real prices for products since the late 1970s. Montana mills' production levels in 1986 illustrate that the industry can now operate at very high output levels under poorer market conditions. By reducing manufacturing costs with increased output per worker, Montana's forest products industry has made giant strides in adapting to the highly competitive operating environment of the 1980s."

Adequate timber supply is an area of concern for the Montana timber industry. Patrick Flowers, supervisor of the Forestry Division of the Department of State Lands in Missoula, is the senior author of the 1987 study, *Montana's Timber Supply: An Inquiry Into Possible Futures*. The study results have several important timber inventory and economic implications. Those results are: 1) There is a general statewide increase in growing stock inventory, despite decreases on forest industry lands. 2) The projected distribution of harvest by diameter classes indicates a trend toward harvest of smaller trees. 3) Except for the most ambitious timber harvest scenarios, there seems to be little opportunity for timber-based employment increases to promote economic

development. 4) Stumpage prices are expected to increase under all scenarios. Flowers says he believes there can be a viable timber industry in Montana long into the future while still leaving enough lands for wilderness and non-wilderness recreation. (*Great Falls Tribune*, May 11, 1988) He also says that timber supply is just one of the challenges facing the timber industry. The number of workers needed to produce wood products has dropped substantially because of mechanization in the woods and the mills. Flowers says that the industry's future depends on market demand and the industry's ability to deal with small-diameter timber.

A review of the Flowers study was done by the Intermountain Forest Industry Association. (*Great Falls Tribune*, May 11, 1988) Richard Reid, a Missoula-based consultant for the association says the report did not predict shortages in Beaverhead, Madison, Gallatin, and Park counties. In spite of the fact that mills in those four counties have expanded capacity, while the U.S. Forest Service has reduced the proposed timber harvest in that area. Mills have made up for the shortfall by increased logging on private lands, but that supply has been exhausted.

The original Flowers study and the industry review both assume that the Forest Service will be able to log the trees proposed in the forest management plans. Alan McQuillan, an associate professor of forest management at the University of Montana, questions that assumption. About 10% of the proposed timber harvest for the next decade is dependent on passage of a Montana wilderness bill, releasing some undeveloped lands for potential development. Conservationists have appealed the levels of timber harvest proposed by the forest management plans, based on "legitimate legal questions," McQuillan said. Because of regulations protecting the environment, and the expense of preparing timber sales, McQuillan said that budget cuts could limit the Forest Service's ability to prepare the number of timber sales projected by the plan.

John Gatchall, Director of the Montana Wilderness Association, says that below-cost timber sales are also an issue in the area of timber sales on U.S. Forest Service lands. As federal agencies experience funding cuts, subsidies may not be available through the Forest Service and timber may not be able to be harvested unless it is done economically. (*Dillon Tribune*, January 28, 1986)

According to the Wilderness Society, a great deal of public attention has focused on below-cost timber sales on the national forests and sales in the intermountain region of the western U.S. have faced particularly intense scrutiny in recent years. Because of low yields and generally poor quality stands, receipts from timber produced in this region have routinely failed to recover the costs of timber access and harvesting. On the Beaverhead National Forest alone, timber costs have exceeded receipts by a wide margin during each of the years, 1979 to 1984, and losses have averaged approximately two million dollars per year during that time period. Those losses include the costs of sales preparation and administration, reforestation and stand improvement, and timber road construction. (Wilderness Society, *Critique of the Draft Beaverhead National Forest Plan*, May 1985)

The health of the timber industry is also highly dependent upon housing construction. According to the Northwest Power Planning Council, other factors affecting lumber and plywood demand include housing types, average unit size growth in other end-uses for lumber and plywood, and international demand. (*Economic, Demographic and Fuel Price Assumptions*, March 9, 1988) Currently, in June 1988, housing is strong nationally, but is predicted to weaken over the next year as interest rates climb slowly.

## TOURISM

The seven county area in southwestern Montana has significant cultural and recreational opportunities for tourists. Cultural attractions include art centers, museums, art galleries, and related activities. Recreational activities include float trips, hunting, fishing, canoeing, camping, backpacking, cross country and downhill skiing, and mountain climbing. Tourist attractions include ghost towns, mining camps, and places with historic significance. This area is generally located between Yellowstone and Glacier National Parks. It has breathtaking landscapes that include high mountains and scenic mountain valleys, clear rivers and streams, mountain lakes, and blue sky that has earned the state the nickname, "Big Sky Country."

For more information on cultural and recreational facilities, see Section 3, Community Facilities and Services, Cultural and Recreational Facilities. For detailed information on recreational and cultural activities and attractions, see Section 5: Recreation and Tourist Activities and Attractions.

Tourism is an industry which has been steadily growing in the state and it is predicted that over \$1 billion will be spent in Montana in 1988 alone. Several signs point to bigger tourism seasons in the state. Chief of the Montana Travel Promotion Division, John Wilson, predicted that the tourism industry in Montana could see a 5 to 10% increase over the estimated \$900 million spent last year by both Montana and out-of-state travelers. Wilson's office is responsible for national magazine advertisements and a new television advertising campaign. Montana's tourism promotion budget has been boosted this year by the 10-month-old accommodations tax on hotel and motel customers. The tax has raised \$2.4 million this far, with \$570,000 distributed to six regional tourism organizations and the remainder used by the state.

The accommodations tax for the Headwaters area is shown in the following Table.

**TABLE 23: ACCOMMODATIONS TAX, HEADWATERS AREA**

COUNTY	JULY 1-DEC. 31 1987	JAN. 1-MAR. 31 1988	TOTAL TO DATE
Beaverhead	\$ 32,937	\$ 9,128	\$ 42,065
Deer Lodge	\$ 4,801	\$ 1,079	\$ 5,880
Granite	\$ 4,506	\$ 887	\$ 5,393
Jefferson	\$ 6,003	\$ 865	\$ 6,868
Madison	\$ 28,166	\$ 1,497	\$ 29,663
Powell	\$ 15,416	\$ 1,587	\$ 17,003
Silver Bow	\$132,962	\$ 41,650	\$174,612
Headwaters Area Total	\$224,791	\$ 56,693	\$281,484

John Wilson, head of the Montana Promotion Division, cited many reasons for the optimistic predictions in tourism this year. (*Great Falls Tribune*, May 4, 1988) Those reasons are: 1) Canadians, discouraged from vacationing in Montana because their dollars were worth only \$.70 for years, have seen the exchange rate increase to \$.80, thanks to the devalued U.S. dollar. Canadians traditionally have represented 20% of the Montana tourism market and their rebounding dollar already has blessed the state's ski industry. 2) The decline of the U.S. dollar overseas may encourage more Americans to vacation in this country and prompt travelers from the Orient and Europe to consider U.S. vacations. Montana may get a share of that business. The U.S. Travel and Tourism Administration reports that travel from Japan is up 25 % this year, while the number of tourists from England and Germany has increased 15% and 14%, respectively. 3) Gas prices are remaining "reasonable and moderate," and should continue that way because the Organization of Petroleum Exporting Countries (OPEC) has been unable to agree on a price plan. 4) Manufacturers of recreational vehicles reported a 12% increase in orders last year and that reflects consumer confidence in the travel market. 5) The National Park Service, which manages Glacier and Yellowstone National Parks, is predicting at least a 3% increase in visitors this year. 6) Hotel and motel reservations for chartered-bus group tours are up 10% so far. Jim Manion, executive vice president of the Montana Automobile Association, said member requests for trip plans are up 20% over a year ago. Last May requests were down 9% from a year earlier. 7) A growing colony of "snowbirds -people who live in the warm Southwest during the winter and migrate north for the summer-also plays a part in Montana's improved tourism picture. Montana weather is "a marketable commodity" for people who want to escape the heat and humidity of summer elsewhere.

## TRANSPORTATION

A major strength of this region is in its transportation infrastructure, which facilitates domestic and international shipping. Generally, Butte is the transportation center of Montana and the Northern Rocky Mountain region. The intersection of I-90 and I-15, the presence of four railroads and the Port of Montana provide a strong transportation infrastructure for the region.

The Port of Montana has facilities at the intersection of Interstate Highways 15 and 90 and on the Union Pacific and Burlington Northern Railroads. The Port of Montana is a shipping facility that specializes both in containerized cargoes received by rail directly from ships docking at Seattle and in products to be containerized in Butte for shipments leaving from Seattle for foreign countries. The Port of Montana offers low-cost unpacking and breaking down of foreign shipments destined for certain midwestern and eastern cities, and also has warehousing facilities available.

For additional information on transportation in the Headwaters RC&D area, see Section 1: Southwestern Montana-An Overview, Transportation Linkages.

## **LABOR FORCE**

Nationally, there is a tight labor market and many companies are taking steps to avoid those tight labor supplies by seeking out-of-the-way places with more abundant supplies of labor. The following excerpt is from page 25 of the June 8, 1988 *Wall Street Journal*: "Labor shortage is the No. 1 challenge facing American business today, without a doubt," says Senior vice president at Moran, Stahl & Boyer Inc., a New York business-location consultant. "Sharply diminished labor pools and increased costs of living have caused the allure of entrepreneurial hotbeds such as greater Boston and Santa Clara County, California, to wane in recent years."

Population trends indicate that a sizable and increasingly better-educated workforce exists in the region. Statistically, Montana workers rank high in productivity per worker. Labor costs and the cost of living in the area are relatively low compared to national averages. The quality of the work force, the level of education, and their productivity combined with the low cost of labor are valuable assets in attracting industry into the area.

## **ENERGY**

Montana Power Co. and Bonneville Power Administration are locally available power sources which insure both power availability and rate competitiveness. Economic development incentive rates may be secured by negotiation.

Montana industries pay substantially less for energy than the majority of the nation, partially due to the state's abundance of low-cost hydroelectric power. Montana can be expected to maintain its utility cost advantage over the long term. The state contains large reserves of coal, oil, and natural gas, enabling it to economically supply substantial amounts of its own energy well into the future.

Montana Power is also a major provider of jobs in the area, with its corporate headquarters located in Butte.

## **LOCAL BUSINESS DEVELOPMENT**

Local and economic development corporations located in Beaverhead, Deer Lodge, Powell, and Silver Bow Counties encourage local business development in the counties.

The Beaverhead Development Corporation serves the area of Beaverhead County, primarily an agricultural and mining community that covers approximately 5,560 square miles of Montana. It is the primary purpose of the Beaverhead Development Corporation to assist area businesses, to encourage local people to develop new businesses, and to encourage out-of-area business to locate in the area. To help foster local growth, the corporation notifies local business people to government contracts being let for bid in our area and assists local concerns with information on public and private grants.

The past 12 months have seen the start-up of a major manufacturing plant in the Dillon area and a community development block grant is being actively sought to help start a revolving loan program for the development corporation to use in aiding local business expansion and development. Dillon is also being considered as the home base for the ag incubator without walls project.

Dillon's manufacturing plant is a hay cubing operation which employs approximately 50 people. As an additional boost to the economy, the company purchases hay from growers throughout the southwestern quarter of

Montana and the northern fringe of Idaho at the projected rate of 9,000 tons per month. This hay is cubed and is primarily being exported to the Pacific Rim countries. This plant is and looking at the possibility of expanding its facilities and will be one of the first participants in the revolving loan program which the development corporation is proposing.

The Anaconda-Deer Lodge economic base is undergoing continuous transition and diversification. The two industrial park areas are to attract and house firms not totally traditional to the area. While smelting was important to the area in the past ten years, Anaconda is now host to mining interests in the form of at least five new mining ventures within a ten-mile radius of the community. Industries involved with the clean up and utilization of waste materials from old smelting operations are also locating in the area.

Anaconda is becoming a bedroom community for the surrounding area as individuals are employed by larger government institutions and larger corporations in Butte, Warm Springs, and Deer Lodge.

Expanding recreation operations at Discovery Basin Ski Area and Fairmont Hot Springs Resort, as well as the Pintlar Scenic Area are expanding Anaconda's tourism base.

Light manufacturing and service businesses whose major trade area is the northwest have been established. These firms range from furniture manufacturers and seed potato producers to hazardous waste removal and manufacturing and installation of mining and environmental control equipment.

The community has broadened its economic base by substituting reliance on one industry to diversification into five or six major groups in the area.

Powell County Progress is currently working to assist two manufacturers who have the potential to locate in and produce their products in Powell County. The first project involves the production and marketing of a special helmet which would be used to increase safety applications and reduce welding operation time for arc welders. The second project is the manufacturing and marketing of an innovative exercise machine which was designed and developed locally. A third established business which already has assembling capacity may be able to provide services for the first two projects.

Powell County Progress is also involved in the historic restoration of Montana State prison Brickyard for the purpose of starting an art and cultural education center. Long range plans for the center include art studios, theater, a resident artist program, art therapy, art classes, and workshops.

Additionally, plans are being made to renovate the Deer Lodge Hotel, which closed about one year ago, and put in senior citizen apartments. The building would also provide space for businesses.

Butte-Silver Bow has a growing reputation in Montana as a high technology center. This reputation stems from the presence of the Montana College of Mineral Science and Technology, several Montana Power Company subsidiaries, the Montana Energy Research and Development Institute (MERDI), the National Center for Appropriate Technology (NCAT), and more. Butte is making a concerted effort to grow as a center for technology-based enterprises by improving its climate for high-tech companies, improving its image of Butte as a high-tech center for Montana, and continuing efforts to attract additional high-tech businesses to the area.

In January 1987, Butte opened the only municipally owned and operated Small Business Development Center in the United States. Currently the center houses 14 businesses and has the potential to house 18 to 20 businesses. The goal of the center is to assist new and existing businesses in establishing a steady, profitable growth.

Evan Barrett, director of the Butte Local Development Corporation, recently announced plans for a Montana International Trade and Product Center at Butte's Montana Agri Food Industrial Complex. (*Montana Standard*, June 12, 1988) Long range plans include an area for display of Montana products as well as office areas where buyers and sellers would do business.

A recently formed venture capital group, the Southwest Montana Develop Corporation (SMDC), has been established to provide investment capital to, and otherwise assist small businesses. SMDC will be primarily concerned with businesses which are, or will be located in, one or more of the seven counties in the Headwaters R&D area. The objective of SMDC is to raise a total of \$2.5 million for equity investment in southwestern Mon-

tana businesses. (*Montana Standard*, June 12, 1988) Representatives from the Anaconda Local Development Corporation, the Beaverhead Development Corporation, Powell County Progress, and county representatives from the counties without formal development groups (Granite, Jefferson, and Madison) who participate in the Headwaters RC&D Economic Development Committee will also have input into the development council of the SMDC.

## MONTANA ECONOMIC OUTLOOK

Maxine Johnson of the Bureau of Business and Economic Research reports that 1987 was a year of little or no growth for Montana, but the Bureau's projections for the next few years suggest some improvement. (*Montana Business Quarterly*, Spring 1988) She notes that, if the Bureau's forecasts are correct, the state will have three years of very slow but steady growth, both in total personal income and nonfarm labor income for the first time in this decade.

Ms. Johnson reports that total personal income-after accounting for inflation-may inch up a little over 1% this year, perhaps just over 2% next year, and back to 1.6% in 1990, with the growth evenly split between labor and nonlabor income. See the following table for the dollar figures for personal income by major component for 1985-1990. This table includes the Bureau's forecasts by industry. Among the basic industries, only mining and the federal government are projected to provide increases in labor income, after accounting for inflation. Derivative industries, such as trade, service, finance, and government, are also expected to experience modest increases in labor income, while wholesale and retail trade and the service industries will provide most of the new dollars. Ms. Johnson suggests that there may be some growth in nonresident travel, but notes that there are no current figures for that industry.

SOURCES: U.S. Dept. of Commerce, Bureau of Economic Analysis, and University of Montana, Bureau of Business and Economic Research, *Economics Montana*

The Bureau projects slow growth in employment, indicating that 5,000 new jobs may be added during the next three years. The following table provides employment projections of nonfarm civilian wage and salary jobs only. Neither farm workers nor self-employed workers are included in these employment figures.

According to the Bureau of Business and Economic Research, Montana Index of Consumer Sentiment, the 1988 consumer outlook is somewhat more upbeat than in previous years. (*Montana Business Quarterly*, Spring 1988) The Bureau's poll takes into account personal household economic situations; personal expectations in economic situations; expectations for the state economy; and general outlook for buying major household items. While Montanans seem to be less pessimistic about the economy than they were last year, but the Index is still well below what it was in 1983 and 1984 and comparable to what it was in November 1982.

## WIC PROGRAM

The Special Supplemental Food Program for Women, Infants, and Children (WIC) provides low income, pregnant, postpartum, and lactating women, infants and children (up to age five), at nutritional risk, with:

1. Nutrition assessment, education and counseling to improve eating behaviors and reduce nutritional problems;
2. Selected foods to supplement diets lacking nutrients needed during this critical time of growth and development;
3. Access to preventive health programs and referral to private and public health providers.

# WATER SUPPLY, WASTE MANAGEMENT, AND WASTEWATER TREATMENT

---

## BEAVERHEAD COUNTY

<b>TOWN:</b>	<b>Dell</b>
<b>PUBLIC WATER SUPPLY:</b>	None
<b>SOLID WASTE MANAGEMENT:</b>	Beaverhead County Refuge District
License Number:	None (Operates under variance)
Class Number:	Class 2
<b>SEWER FACILITIES:</b>	None

<b>TOWN:</b>	<b>Dillon</b>
<b>PUBLIC WATER SUPPLY:</b>	Surface water supplemented by ground water
Source:	Rattlesnake Creek; 5 wells
Reserve:	3 reservoirs with a total of 750,000 gal. capacity
Supply:	a. Quantity: Water right on surface water - approx. 400,000 gallons/day
	b. Quality: Ground Water - 3000-4000 gallons/minute
Distribution System:	Unfiltered surface water*
Treatment:	Information available at local level
	Surface water-chlorination;
	Ground Water-chlorination
Recent Construction:	Some improvements in surface water disinfection system in 1986
Comments:	*Does not currently meet filtration requirements of the federal
	Safe Drinking Water Act, 1986 Amendments
<b>SOLID WASTE MANAGEMENT:</b>	Dillon Landfill
License Number:	206
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Aerated lagoon & Facultative lagoon
Design Capacity in MGD:	1.1 MGD
Discharge:	Beaverhead River

<b>TOWN:</b>	<b>Grant</b>
<b>PUBLIC WATER SUPPLY:</b>	None
<b>SOLID WASTE MANAGEMENT:</b>	Beaverhead County Refuge District
License Number:	None (Operates under variance)
Class Number:	Class 2
<b>SEWER FACILITIES:</b>	None

<b>TOWN:</b>	<b>Jackson</b>
<b>PUBLIC WATER SUPPLY:</b>	Ground water
Source:	Natural hot springs
Reserve:	6,000 gal. spring box
Supply:	a. Quantity: Unknown-not metered
	b. Quality: Currently complies with Montana drinking water regulations
Distribution System:	Information available at local level
Treatment:	None
Recent Construction:	Covered spring box in 1984
Comments:	New water system in planning stages
<b>SOLID WASTE MANAGEMENT:</b>	Beaverhead County Refuge District
License Number:	None (Operates under variance)
Class Number:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Septic tank or raw sewage discharge
Design Capacity in MGD:	N/A
Discharge:	Warm Springs Creek
Comments:	New facility to be built in approximately one year
<b>TOWN:</b>	<b>Lima</b>
<b>PUBLIC WATER SUPPLY:</b>	Shallow ground water
Source:	Spring located approximately one mile from town
Reserve:	200,000 gal. storage reservoir
Supply:	a. Quantity: 500 gallon/minute water right
	b. Quality: Currently complies with Montana drinking water regulations
Distribution System:	Information available at local level
Treatment:	Chlorination
Recent Construction:	Replaced a major portion of distribution system and built a new reservoir in 1986-1987
<b>SOLID WASTE MANAGEMENT:</b>	Lima Landfill
License Number:	15
Class:	Class 2
<b>SEWER FACILITIES:</b>	None
<b>TOWN:</b>	<b>Wisdom</b>
<b>PUBLIC WATER SUPPLY:</b>	None
<b>SOLID WASTE MANAGEMENT:</b>	Beaverhead County Refuge District
License Number:	None (Operates under variance)
Class Number:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Facultative lagoon
Design Capacity in MGD:	.13 MGD
Discharge:	No discharge
<b>TOWN:</b>	<b>Wise River</b>
<b>PUBLIC WATER SUPPLY:</b>	None
<b>SOLID WASTE MANAGEMENT:</b>	40 yard container
License Number:	284
Class Number:	Class 2
<b>SEWER FACILITIES:</b>	None

## DEER LODGE COUNTY

<b>TOWN:</b>	<b>Anaconda</b>
<b>PUBLIC WATER SUPPLY:</b>	Shallow ground water
Source:	3 wells
Reserve:	None
Supply:	a. Quantity: 3000-4000 gallons/minute
	b. Quality: Currently complies with Montana drinking water regulations
Distribution System:	Information available at local level
Treatment:	Chlorination
Recent Construction:	Information available at local level
<b>SOLID WASTE MANAGEMENT:</b>	Anaconda Landfill
License Number:	65
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of Plant:	Aerated lagoon
Design Capacity in MGD:	3.0 MGD-summer; 2.5 MGD-winter
Discharge:	Infiltration/Percolation

<b>TOWN:</b>	<b>Galen</b>
<b>PUBLIC WATER SUPPLY:</b>	Ground water
Source:	2 wells
Reserve:	50,000 gallon reservoir
Supply:	a. Quantity: Approx. 800/gallons/minute
	b. Quality: Currently complies with Montana drinking water regulations
Distribution System:	Information available at local level
Treatment:	Chlorination
Recent Construction:	Information available at local level
<b>SOLID WASTE MANAGEMENT:</b>	Anaconda Landfill
License Number:	65
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Conventional Activated Sludge
Design Capacity in MGD:	.15 MGD
Discharge:	Clark Fork River

<b>TOWN:</b>	<b>Opportunity</b>
<b>PUBLIC WATER SUPPLY:</b>	None
<b>SOLID WASTE MANAGEMENT:</b>	Anaconda Landfill
License Number:	65
Class:	Class 2
<b>SEWER FACILITIES:</b>	None

<b>TOWN:</b>	<b>Warm Springs State Hospital</b>
<b>PUBLIC WATER SUPPLY:</b>	Ground water
Source:	2 wells
Reserve:	100,000 gallon storage reservoir
Supply:	a. Quantity: Approx. 1200 gallons/minute
	b. Quality: Currently complies with Montana drinking water regulations
Distribution System:	Information available from Warm Springs State Hospital
Treatment:	Chlorination

Recent Construction:	Information available at local level
<b>SOLID WASTE MANAGEMENT:</b>	Anaconda Landfill
License Number:	65
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Facultative Lagoon
Design Capacity in MGD:	Information available from Warm Springs State Hospital
Discharge:	Clark Fork River

## GRANITE COUNTY

### **TOWN:** Drummond

<b>PUBLIC WATER SUPPLY:</b>	None
<b>SANITARY LANDFILL:</b>	Granite Co. Container System
License Number:	231
Class:	Class 2
<b>SOLID WASTE MANAGEMENT:</b>	Charles Parke Landfill
License Number:	267
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Facultative Lagoon
Design Capacity in MGD:	.075 MGD
Discharge:	Clark Fork River

### **TOWN:** Philipsburg

<b>PUBLIC WATER SUPPLY:</b>	Surface water
Source:	Fred Burr Lake and Frost Creek
Reserve:	200,000 gallon reservoir
Supply:	a. Quantity: Information available at local level
	b. Quality: Unfiltered surface water*
Distribution System:	Information available at local level
Treatment:	Chlorination
Recent Construction:	Information available at local level
Comments:	*Does not currently meet filtration requirements of the Federal Safe Drinking Water Act, 1986 Amendments
<b>SOLID WASTE MANAGEMENT:</b>	Philipsburg Landfill
License Number:	265
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of Plant:	Facultative lagoon
Design Capacity in MGD:	.2 MGD
Discharge:	Flint Creek

### **TOWNS:** Bearmouth, Hall, Maxville

<b>PUBLIC WATER SUPPLY:</b>	None
<b>SOLID WASTE MANAGEMENT:</b>	Granite Co. Container System
License Number:	231
Class:	Class 2
<b>SEWER FACILITIES:</b>	None

## JEFFERSON COUNTY

**TOWN:** Alhambra

**PUBLIC WATER SUPPLY:** None

**SOLID WASTE MANAGEMENT:** None

**SEWER FACILITIES:** Hillbrook Nursing Home

    Type of Plant: Activated Sludge

    Design Capacity In MGD: .15 MGD

    Discharge: Prickley Pear Creek

**TOWN:** Basin

**PUBLIC WATER SUPPLY:** Ground water

    Source: 1 Well

    Reserve: Reservoir-200,000 gal. capacity

    Supply: a. Quantity: 300 gpm

            b. Quality: Currently complies with Montana drinking water regulations

    Distribution System: Information available at local level

    Treatment: None

    Recent Construction: Information available at local level

**SOLID WASTE MANAGEMENT:** Jefferson Co. Container Program

    License Number: 201

    Class: Class 2

**SEWER FACILITIES:**

    Type of plant: Aerated Lagoon

    Design Capacity in MGD: N/A

    Discharge: Infiltration/Percolation

**TOWN:** Boulder

**PUBLIC WATER SUPPLY:** Ground Water

    Source: 4 wells between 50 and 100 feet deep

    Reserve: 2 ground level storage tanks - 575,000 gal. capacity

    Supply: a. Quantity: Approx. 2000 gallons/minute

            b. Quality: Currently complies with Montana drinking water regulations

    Distribution System: Information available at local level

    Treatment: None

    Recent Construction: Information available at local level

**SOLID WASTE MANAGEMENT:** Boulder Landfill

    License Number: 200

    Class: Class 2

**SOLID WASTE MANAGEMENT:** City-County Sanitation Service

    License Number: 296

    Class: Class 2

Class:	Class 2
<b>SOLID WASTE MANAGEMENT:</b>	Montana Tunnels Mine, Montana City
License Number:	280
Class:	Class 3
<b>SEWER FACILITIES:</b>	None

<b>TOWN:</b>	<b>Whitehall</b>
<b>PUBLIC WATER SUPPLY:</b>	Ground Water
Source:	3 Wells
Reserve:	Reservoir-200,000 gal. capacity
Supply:	a. Quantity: 300 gpm
	b. Quality: Currently complies with Montana drinking water regulations
Distribution System:	Information available at local level
Treatment:	None
Recent Construction:	Information available at local level
<b>SOLID WASTE MANAGEMENT:</b>	Whitehall Landfill
License Number:	264
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Facultative Lagoon
Design Capacity in MGD:	.25 MGD
Discharge:	Big Pipe Stone Creek, Jefferson River

## MADISON COUNTY

<b>TOWN:</b>	<b>Ennis</b>
<b>PUBLIC WATER SUPPLY:</b>	Ground Water
Source:	2 Wells
Reserve:	2 Reservoirs-Total 240,000 gal. capacity
Supply:	a. Quantity: Approx. 500 gallons/minute
	b. Quality: Currently complies with Montana drinking water regulations
Distribution System:	Information available at local level
Treatment:	None
Recent Construction:	Information available at local level
<b>SOLID WASTE MANAGEMENT:</b>	Ennis Landfill
License Number:	190
Class:	Class 2
<b>SEWER FACILITIES:</b>	
Type of plant:	Facultative Lagoon
Design Capacity in MGD:	.18 MGD
Discharge:	Madison River

<b>TOWN:</b>	<b>Sheridan</b>
<b>PUBLIC WATER SUPPLY:</b>	Surface Water; Shallow Ground Water;
Source:	Indian Creek; 3 Wells
Reserve:	Ground level steel storage tank-300,000 capacity
Supply:	a. Quantity: Approx. 600 gallons/minute

	b. Quality:	Unfiltered surface water*
Distribution System:		Information available at local level
Treatment:		Surface water-Chlorination
		Ground water-None
Recent Construction:		Information available at local level
Comments:		*Does not currently meet filtration requirements of the Federal Safe Drinking Water Act, 1986 Amendments
<b>WASTE MANAGEMENT:</b>		Madison Co. Container Program
License Number:		263
Class:		Class 2
<b>SEWER FACILITIES:</b>		
Type of plant:		Facultative Lagoon
Design Capacity in MGD:		.07 MGD
Discharge:		Mill Creek via unnamed ditch

**TOWN:** Twin Bridges

<b>PUBLIC WATER SUPPLY:</b>		Ground Water
Source:		2 Wells
Reserve:		Elevated storage tank - 50,000 gal. capacity
Supply:	a. Quantity:	1200 GPM
	b. Quality:	Currently complies with Montana drinking water regulations
Distribution System:		Information available at local level
Treatment:		None
Recent Construction:		Information available at local level
<b>SOLID WASTE MANAGEMENT:</b>		Madison Co. Container Program
License Number:		263
Class:		Class 2
<b>SEWER FACILITIES:</b>		
Type of plant:		Facultative Lagoon
Design Capacity in MGD:		.06 MGD
Discharge:		No discharge
Comments:		Does not meet current discharge standards; Failing lagoon with effluent discharging into ground water.

**TOWN:** Virginia City

<b>PUBLIC WATER SUPPLY:</b>		Shallow ground water
Source:		Springs
Reserve:		Storage tank-100,000 gal. capacity
Supply:	a. Quantity:	Unknown
	b. Quality:	Does not comply with Montana drinking water regulations
Distribution System:		Information available at local level
Treatment:		Chlorination
Recent Construction:		Information available at local level
<b>SOLID WASTE MANAGEMENT:</b>		Madison Co. Container Program
License Number:		263
Class:		Class 2
<b>SEWER FACILITIES:</b>		
Type of plant:		Facultative Lagoon

## FIRE PROTECTION

The Insurance Services Organization, Inc. (ISO) is responsible for rating incorporated cities or fire districts on a one to ten scale. The public protection classification number is based on a number of areas including water supply, manpower, and equipment.

**TABLE 30: FIRE PROTECTION RATINGS**

COUNTY	TOWN	RATING
Beaverhead	Dillon	5
Beaverhead	Lima	8
Deer Lodge	Anaconda	6
Deer Lodge	Anaconda Valley Fire District	9
Deer Lodge	Galen Fire District	8
Deer Lodge	Warm Springs State Hospital	7
Granite	Drummond	9
Granite	Philipsburg	7
Jefferson	Basin	7
Jefferson	Boulder	6
Jefferson	Clancy	9
Jefferson	Montana City	9
Jefferson	Whitehall	7
Madison	Alder	9
Madison	Ennis	8
Madison	Harrison, Pony, Norris Fire District	9
Madison	Twin Bridges	7/9
Madison	Sheridan	7
Madison	Virginia City	9
Powell	Deer Lodge	6
Powell	Race Track Valley Fire District	9
Silver Bow	Big Butte Fire District	5
Silver Bow	Boulevard Fire District	5
Silver Bow	Butte	5
Silver Bow	Butte Silver Bow Fire District	9
Silver Bow	Centerville Fire District	5
Silver Bow	Floral Park Fire District	5
Silver Bow	Home Atherton Fire District	5
Silver Bow	Race Track Fire District	5
Silver Bow	Ramsey Fire District	9
Silver Bow	Rocker Fire District	5
Silver Bow	Terre Verde Heights Fire District	9

NOTE: Class 10 applies to all unincorporated areas not located within a fire protection district.

## Visitor Attractions

The following is a list of visitor attractions in the Headwaters area. (See also: Section 3: Community Facilities and Services, Cultural and Recreational Facilities.)

For information on accommodations-hotels, motels, bed and breakfast inns, ranches, resorts, hostels, hot springs, public and private campgrounds-see *1988 Montana Travel Planner: Lodging, Camping, Adventure Vacations*, available free from Travel Montana, Montana Department of Commerce, 406-444-2654 or 800-541-1447.

COUNTY	ATTRACTION
Beaverhead	Bannack State Park, located 20 miles southwest of Dillon, was the site of Montana's first gold rush, first school, first territorial capital, and the headquarters of the infamous Sheriff Henry Plummer and his road agents. 406-834-3413
	Beaverhead Rock State Monument, 14 miles S. of Twin Bridges, on MT 41. This huge rock shaped like a beaver was recognized as a landmark by Sacajawea in 1805 while guiding the Lewis & Clark expedition.
	The Big Hole Battlefield U.S. Department of Interior National Park Service Wisdom, MT 59761 406-689-3155

The Big Hole Battlefield, west of Wisdom, preserves the scene of a major battle between the Nez Perce Indians, led by Chief Joseph and the U.S. Army.

Elkhorn Hot Springs, Polaris, MT 59746  
406-834-3434

Historic Walking tour of Dillon  
Downtown Dillon. Homes on the tour include those of early merchants and stock-growers. Self-guiding tour brochure.  
406-683-5511

Jackson Hot Springs Lodge, Jackson, MT 59736  
406-834-3151

Montana State Normal School  
710 Atlantic Avenue  
Dillon, MT 59725  
The construction of the main hall of the normal school represented a major commitment by Montana to the development of a public university system.

Red Rock Lakes National Wildlife Refuge  
U.S. Department of Interior  
Fish and Wildlife Service  
Lakeview  
Lima, MT 59739  
406-276-3347

#### Deer Lodge

Anaconda  
Marcus Daly founded Anaconda in 1883 when he erected the Washoe Smelter and Reduction Works.

Lost Creek State Park, 9 miles east of  
Anaconda, on MT 273  
This recreation area features limestone cliffs and Lost Creek Falls.

Montana State Fish Hatchery, City Park  
Anaconda, MT 59711  
406-563-2531

Pintler Scenic Route  
62 miles of US 10A, off I-90. The Pintler Scenic Route travels through high mountain passes, mining and ghost towns, and along the shores of Georgetown Lake.

Washoe Park  
Established and maintained for many years by the Anaconda Copper Mining Company, this park features flower gardens, tennis courts, playground, a lighted baseball diamond, picnic facilities, and a swimming pool.

## Granite

Gem Mountain Sapphire Mine  
24 miles SW of Philipsburg on Rts. 10A and 38  
Dig for sapphires or screen paydirt from  
buckets. 406-859-3530

Georgetown Lake  
This lake offers boating, swimming, and  
fishing in the summer, and ice fishing, snow  
mobiling, and nearby cross country and downhill  
hill skiing in the winter.

Garnet Ghost Town, 40 miles E. of Missoula,  
off MT 200 or I-90. This well-preserved  
ghost town is maintained by the Garnet  
Preservation Association and U.S. Bureau of  
Land Management. 406-494-5059

## Jefferson

Lewis and Clark Caverns, Just off I-90, 47  
miles east of Butte  
Montana's first state park features one of  
the largest known limestone caverns in the  
northwest. 406-287-3541

## Madison

Bear Trap Hot Springs, Norris, MT 59745  
406-685-3303

Ennis National Fish Hatchery  
U.S. Fish & Wildlife Service  
Ennis, MT 59729 406-682-4847

Madison River Canyon Earthquake Area  
The area, in the vicinity of Hebgen and Quake  
Lakes, shows the effects of the August 1959  
earthquake. There is a visitor center northwest  
of West Yellowstone, above Quake Lake.

Robber's Roost, NE of Nevada City on MT 287  
Hangout for hold-up gangs during the early  
gold rush days when stage coaches made  
regular runs between Bannack and Virginia  
City.

Virginia City and Nevada City  
On MT 87, NW of Yellowstone Park.  
Two old mining camps of the gold rush days  
with exhibits and displays of the old west.  
19th Century melodrama and entertainment by  
the Virginia City Players during the summer.  
406-843-5377

## Powell

Gem Find  
East Side Road, Deer Lodge  
Screen paydirt from nearby Gem Mountain  
Sapphire Mine. (See this section: Granite  
County, Gem Mountain Sapphire Mine)

Grant-Kohrs Ranch  
National Historic Site  
316 Main Street  
P.O. Box 790

## SECTION SIX

---

### DEVELOPMENT ORGANIZATIONS

---

# DEVELOPMENT ORGANIZATIONS

---

For the purposes of this report, development organizations are any organizations that are doing any of the following: organizing on the local level, working for rural development, or working with local grassroots groups or government sponsored agencies or organizations.

## FEDERAL GOVERNMENT

### Small Business Administration (SBA)

Region VIII Office  
Federal Building, Room 528  
301 South Park  
Helena, MT 59626 406-449-5381

The U.S. SBA is a small, independent Federal agency, created by Congress in 1953 to assist, counsel, and champion the millions of American small businesses which are the backbone of this country's competitive enterprise free-enterprise economy.

### U.S. Department of Agriculture

Agriculture Stabilization & Conservation Service (ASCS)  
State Office  
Federal Building  
Bozeman, MT 59715 406-587-6872

ASCS administers commodity and related land use programs designed for voluntary production adjustment, resource protection, and price, market, and farm income stabilization.

Farmers Home Administration (FHA)  
Information Staff  
Washington, DC 20250 202-447-4323

The FHA administers loans in the following areas: Operating loans, youth project loans, emergency loans, farm ownership loans, loans to limited resource farmers, soil and water conservation loans, loans to Indian tribes, loans to associations, rural housing loans, watershed protection and flood prevention loans, resource conservation and development loans, community facility loans, and business and industry loans.

Federal Crop Insurance Corporation (FCIC)  
2401 Grand Avenue, 4th Floor  
Billings, MT 59102 406-657-6196

The primary goal of the FCIC is to improve the economic stability of agriculture through a sound system of crop insurance.

Rural Electrification Administration (REA)  
Public Information Office  
Washington, DC 20250 202-382-1255

The REA is a credit agency of the U.S. Dept. of Agriculture that assists rural electric and telephone utilities to obtain loan financing.

Soil Conservation Service (SCS)  
Resource Conservation and Development Program  
Federal Building, Room 443  
10 East Babcock Street  
Bozeman, MT 59715 406-587-6863

SCS has responsibility for developing and carrying out a national soil and water conservation program in cooperation with landowners and operators and other land users and developers, with community planning agencies and regional resource groups and with other Federal, State, and local government agencies. SCS also assists in agricultural pollution control, environmental improvement, and rural community development.

### **U.S. Department of Commerce**

Economic Development Administration (EDA)  
Federal Building  
P.O. Box 10074  
Helena, MT 406-449-5074

The EDA was established under the Public Works and Economic Development Act of 1965 to generate new jobs, to help protect existing jobs and to stimulate commercial and industrial growth in economically distressed areas of the United States.

Minority Business Development Agency (MBDA)  
Office of Public Affairs  
Washington, DC 20230 202-377-1936

The purpose of the MBDA, formerly the Office of Minority Business Enterprise, is to develop and coordinate a national program for minority business enterprise.

### **U.S. Department of Housing and Urban Development (HUD)**

Federal Building, Room 340  
301 South Park  
Helena, MT 59626-0095 406-449-5202

The Department of Housing and Urban Development is the Federal agency principally responsible for programs concerned with the Nation's housing needs, the development and preservation of the nation's communities, and the provision of equal housing opportunity for every individual. HUD programs include: 1) Community Development Block Grant Program, Office of Block Grant Assistance, 202-755-6587; 2) Section 108 Loan Guarantees, Office of Block Grant Assistance, 202-755-6587; 3) Urban Development Block Grants, Office of Urban Development Action Grants, 202-755-5658; 4) Section 312 Rehabilitation Loans, Office of Urban Rehabilitation, 202-755-5658;

## **STATE GOVERNMENT**

Montana Department of Agriculture  
Agricultural Development Division  
Agriculture/Livestock Building  
6th & Roberts Street  
Helena, MT 59620 406-444-2402

The Agricultural Development Division provides assistance to Montana farmers and ranchers through: 1) the Rural Development Bureau, which administers the Weed Trust Fund, the Agricultural Assistance Program, the Crop Insurance Program, and the Rural Assistance Loan Program; and 2) the Marketing Bureau.

### **Montana Department of Commerce**

Board of Investments  
Office of Development Finance  
555 Fuller Avenue  
Helena, MT 59620 406-442-1970

The Board of Investments' Office of Development Finance is a development agency, not a bank or venture capital company. Its responsibility is to strengthen and diversify the state's economy through prudent investments in qualifying Montana businesses.

Business Assistance Division  
1424 Ninth Avenue  
Helena, MT 59620 406-444-3923

The Business Assistance Division provides comprehensive services that constitute the direct technical assistance component of the "Build Montana" economic development effort, including the following programs: Development Finance Technical Assistance, Marketing Assistance and Montana Produce Promotion, Small Business Advocacy and Business Licensing, International Export Assistance, Manufacturing and U.S. Government Procurement Assistance, Business Retention and Expansion, Assistance to Businesses in the Tourism Industry, Investments in Agriculture, Montana Ambassadors, Business Location, and Assistance to Local Development Organizations.

Community Development Block Grant Program (CDBG)  
Local Government Assistance Division  
Cogswell Building, Room C-211  
Helena, MT 59620 406-444-2488

The state CDBG Program is a competitive federal grant program designed to help communities of less than 50,000 population with their greatest community development needs, with particular emphasis on assisting families with low and moderate incomes. The program is administered nationally by the U.S. Dept. of Housing and Urban Development (HUD). The basic project categories include economic development, housing, neighborhood revitalization, and public facilities.

Local Government Assistance Division  
Cogswell Building, Room C-211  
Helena, MT 59620 406-444-3757

The primary functions of the Local Government Assistance Division are to provide technical and financial assistance to units of local government; to insure local political subdivisions' financial compliance; to grant and administer Federal housing, economic development and public works funds; and to provide administrative support to the Montana Coal Board and the Montana Hard Rock Mining Impact Board.

Science and Technology Alliance  
46 North Last Chance Gulch, Suite 2B  
Helena, MT 59620 406-449-2778

The Science and Technology Alliance was created in 1985 to strengthen Montana's economy by using technological development to revitalize traditional industries and encourage new ones. This effort is designed to strengthen and diversify Montana's economy by establishing a public-private sector partnership to encourage scientific and technological development within the state in order to keep pace with a transforming economic structure and to create new jobs and expand small business opportunities.

## Montana Department of Natural Resources and Conservation

Conservation Districts Division  
1520 East Sixth Avenue  
Helena, MT 59620

406-444-6667

Conservation districts (CDs) are a part of the local government. Montana CDs have been working since Dust Bowl days of the 1930's to promote the wise use, conservation, and development of our soil, water, and related natural resources. CDs give expert assistance in natural resource use and planning, and they initiate and carry out community-wide, resource-based programs with private landowners.

### **CHAMBERS OF COMMERCE:**

P.O. Box 776  
Deer Lodge, MT 59722 406-846-1133

### **PRIVATE ORGANIZATIONS**

#### **Alternative Energy Resources Organization (AERO)**

44 North Last Chance Gulch, #9  
Helena, MT 59601 406-443-7272

AERO is a non-profit, open membership, educational group promoting sustainability of energy resources, agriculture, and community-based economic development.

**Gold West Country of Montana, Inc.**

1155 Main Street  
Deer Lodge, MT 59722 406-846-1943

Gold West Country of Montana is a private regional tourism promotion organization.

**Headwaters Resource Conservation and Development Project Inc. (RC&D)**

Federal Building, Room 263  
400 North Main Street  
Butte, MT 59701 406-723-3074

The Headwaters RC&D is a locally sponsored and directed program which serves Beaverhead, Deer Lodge, Jefferson, Granite, Silver Bow, Madison, and Powell Counties. The goal of the Headwaters RC&D is to help people conserve, develop, and use natural resources with an emphasis on economic benefits and social well-being of all of the people.

**Montana Energy, Research & Development Institute (MERDI)**

P.O. Box 3809  
Butte, MT 59702 406-782-0463

MERDI develops and supports projects to encourage the establishment of technology-based economic development.

**Montanans Organized for a Value-Added Economy (MOVE)**

P.O. Box 507  
Butte, MT 59703 406-723-4061

MOVE targets the resource base of southwestern Montana-agriculture, timber, and minerals-as the core or an economic expansion effort which will "add value" to those resources before they leave the state, creating jobs and growth.

**National Center for Appropriate Technology (NCAT)**

Small Business and Community Development Assistance  
P.O. Box 3838  
Butte, MT 59701 406-494-4572

The NCAT Small Business and Community Development Assistance program: contracts with Butte-Silver Bow to provide one on one technical business counselling to the companies located in the Butte Business Development Center; contracts with the U.S. government to provide specialized business assistance to U.S. based inventors, entrepreneurs, and small businesses involved in renewable or alternate energy projects; and consults with local development groups and communities on incubators and other local economic development topics.

**National League of Cities**

1301 Pennsylvania Ave., N.W.  
Washington, DC 20004 202-626-3000

National League of Cities develops and pursues a national municipal policy which can meet the future needs of cities and help cities solve critical problems they have in common.

**Northern Plains Resource Council (NPRC)**

419 Stapleton Building  
Billings, MT 59101 406-258-1154

NPRC is a grassroots organization actively involved in areas of agricultural credit reform, coal and hard rock mining policies, and air and water quality protection. NPRC has championed many rural issues, balancing the debate among interests such as the federal government, railroads, oil refineries, mining companies, and land developers. NPRC works closely with the Western Organization of Resource Councils, the National Save the Family Farm Coalition, and the Montana Clean Air Coalition. NPRC's affiliates include grassroots groups: Alternative Energy Resources Organization, Bear Creek Council, Big Horn Resource Alliance, Big Muddy Resource Council, Dawson Resource Council, Mussellsheil Agriculture Alliance, McCone Agriculture Protection Organization, Powder River Protective Association, Rosebud Protective Association, Stillwater Protective Association, Tongue River Agricultural Protection Association, Valley Resource Council, and Yellowstone Valley Citizens Council.

#### **Northern Rockies Action Group (NRAG)**

9 Placer Avenue  
Helena, MT 59601 406-442-6615

NRAG's work is designed solely to make positive improvements in the social change movement's abilities and influence. NRAG provides consulting services that include new ideas, skills, and approaches on all areas of organizational growth and development that keep an organization maturing and achieving its goals. Services include annual organization planning, policy making, organizational development, constituency development, board training, organizing, and management support services.

#### **Southwest Montana Development Corporation (SMDC)**

Butte/Silver Bow Business Development Center  
305 W. Mercury 406-723-4349  
Butte, MT 59701 406-723-4061

The objective of SMDC is to promote economic development in the state of Montana by providing investment capital to, and other wise assisting small businesses, with particular emphasis on businesses which are, or will be located in, one or more of the following seven counties of southwestern Montana: Beaverhead, Deer Lodge, Granite, Jefferson, Madison, Powell, and Silver Bow.

#### **Western Environmental Trade Association of Montana (WETA)**

1714 Ninth Avenue  
Helena, MT 59601 406-443-5541

WETA is a coalition of industry, labor, agriculture, recreation, and other trade associations. It was organized for the purpose of promoting employment and economic opportunities in a manner consistent with the protection of the physical environment.

#### **Women Involved in Farm Economics (WIFE)**

Lavina Lubinas  
Castle Battle Road  
Lewistown, MT 59457 406-538-8641

WIFE Associations, comprised of local chapters, monitor state affairs that have impact on agriculture. WIFE believes in the "family farm" concept for the production of this nation's food and fiber. Nationally, WIFE consists of a strongly organized network of women across the entire United States.

#### **Women In Timber (WIT)**

Barbara Buentemeier, President  
2225 Dillon Road  
Columbia Falls, MT 59912 406-862-3897

WIT supports reasonable timber resource use and development. WIT has available a teacher's packet on timber facts and management and a video cassette tape on the forest products industry for use in school or groups.

**Women's Resource Center**

P.O. Box 888  
25 East Glendale  
Dillon, MT 59725

406-683-6106 (office)  
406-683-4817 (helpline)

For over a decade, the Women's Resource Center of Dillon has provided women in Beaverhead and Madison Counties with a network for friendship, support, and civic action. Women's Resource Center program include: 1) the New Option Program which helps single parents/displaced homemakers assess and enhance job-seeking skills, coping strategies and self-image; 2) the Judy Focher Memorial Fund which provides community schools and libraries with books and periodicals reflecting the strength and competence of women and showing girls and women in a positive light; 3) the community resource book; 4) referrals for family planning and epilepsy care; 5) safe-homes for women and children endangered by family violence; 6) assistance to crime victims, offering support, counseling, and advocacy for victims of domestic violence; and 7) 24-hour helpline responding to people in crisis.
